

Coffee Shop Website

Description

This project is a modern coffee shop website featuring a Home page, Menu, About section, and Contact page. It is designed to provide customers with an easy and enjoyable browsing experience while showcasing the coffee shop's products, services, and brand.

Synopsis

The **Coffee Shop Website** is a responsive and user-friendly web application developed using modern web technologies. The website provides visitors with an attractive interface to explore the coffee shop, browse the menu, learn about the business, and contact the shop for inquiries.

The project emphasizes a clean design, intuitive navigation, and responsive layouts to ensure a seamless experience across desktops, tablets, and mobile devices. It demonstrates the implementation of front-end web development concepts, including structured HTML, styled CSS, and interactive JavaScript components.

Features

- 🏠 Home page with an attractive landing section
- ☕ Menu page displaying coffee and beverages
- ⓘ About page with coffee shop information
- 📞 Contact page for customer inquiries
- 📱 Fully responsive design
- 🎨 Modern and clean user interface
- ⚡ Smooth navigation and user experience

Technologies Used

- HTML5
- CSS3
- JavaScript

Project Objective

The objective of this project is to build a visually appealing and responsive coffee shop website that enhances user experience and provides essential information about the coffee shop in an organized and engaging manner.

Future Enhancements

- Online ordering system
- User authentication
- Shopping cart functionality
- Payment gateway integration
- Customer reviews and ratings
- Dark mode support
